Usage Policy**

**MULROY COLLEGE**  
**ICT Acceptable Usage Policy**

**Mulroy College embodies mutual respect in a caring environment while enabling students to achieve personal success and move with confidence into a world of endless opportunities.**

## **ICT Acceptable Usage Policy**

### **Introduction**

Mulroy College provides a comprehensive and modern ICT infrastructure to its staff and students to create a technology-enabled teaching and learning environment. Our goal in providing this service is to promote educational excellence in the school by facilitating curriculum design, resource sharing, innovation, and communication. The aim of this ICT Acceptable Usage Policy is to ensure that staff and students benefit from the learning opportunities offered by those facilities in a safe and effective manner.

Mulroy College is committed to making ICT an integral part of its teaching and learning environment:

- To enhance the curriculum by using ICT as a tool to enhance teaching and learning to raise standards.
- To encourage creativity, collaboration, communication and critical thinking by using technology.
- To prepare students to meet the demands of a technology based society.
- To use technology to gather and share information in real time so as to meet the personalised needs of each student.
- To enable teachers to support and instruct their students in the safe, effective and appropriate use of technology.

Internet and ICT usage is considered a school resource to aid teaching and learning in the classroom to ensure a quality learning experience for our students. Therefore, it is necessary to provide guidelines on effective usage and to prohibit certain illicit activities. In appropriate cases the school will deal with such breaches under the school's Code of Behaviour.

### **This Acceptable Usage policy covers the following areas:**

- Usage Guidelines
- Network Storage
- Internet Access & Email

#### ➤ **Usage Guidelines:**

The ICT facilities in the school have been established for educational purposes, which includes classroom activities, career development and limited high quality self-discovery activities, such as project work and research. Students are responsible for good behaviour while using the school's ICT facilities. The school reserves the right to place reasonable restrictions on the material that students access or post through the system. Students are also expected to follow the rules set forth by the law in their use of the ICT facilities.

#### ➤ **Network Storage**

Network storage areas (online & on school server) may be treated like school lockers in that they are liable to inspection. School network administrators may review files and communications to maintain system integrity and ensure that users are using the system responsibly. Users should not expect that files stored on Donegal ETB servers will always be private. Internet and Email Communications on the network are often public in nature. The school's Code of Behaviour and Discipline governs such behaviour and communications. A content filter also controls Internet access in the school. This filter is designed to protect students from harmful material as well preventing frivolous internet access during school time. Students using the Internet and email are expected to abide by the generally-accepted rules of network etiquette. The use of the Internet to harass or bully other members of the school community will result in sanctions up to and including removal from the school (please refer to the school's Anti-bullying Policy, Mobile Phone and Electronic Devices Policy and Code of Behaviour).

#### ➤ **Internet Access and Email**

This is a powerful learning tool, but it should not be used indiscriminately or without supervision. While students are at school, staff will make every reasonable effort to ensure that this resource is used appropriately. As parents / guardians, it is also to monitor this resource at home, not unlike the manner in which you monitor use of TV, video games, or the telephone. It is not advisable for children to engage in long hours of unsupervised time on-line.

All students are issued with an email address as they begin their education in Mulroy College and this is the email they must use for all school based correspondence including access to Google Classroom, Google Hangouts/Meet and email. This email is on a secure network for the school and all teachers to communicate with students online through this process

### **Access to remote learning**

As a Google Reference School Mulroy College uses numerous applications of the Google Education suite for both teaching and learning in the classroom and for remote teaching and learning.

Our Communication and Learning Platform has long been established in Mulroy College and each year we develop as a Google Reference School to advance our own Professional Development and to ensure the highest standards of teaching and learning through the best and safest platforms.

Each class group is given a unique identifier code to allow students from that specific class group access to that Google Classroom. Teachers post assessments online and give individual feedback online. All online communication must remain appropriate and within the parameters of our Code of Behaviour ensuring all members of the school community work through mutual respect.

### **Netiquette**

Netiquette may be defined as appropriate social behaviour over computer networks and in particular in the online environment.

- Students should always use the Internet, network resources, and online sites in a courteous and respectful manner
- Students should also recognize that among the valuable content online is unverified, incorrect, or inappropriate content. Students should use trusted sources when conducting research via the Internet
- Students should not post anything online that they wouldn't want parents, teachers, or future colleges or employers to see. Once something is online, it is out there - and can sometimes be shared and spread in ways you never intended
- Students should use school facilities for educational purposes
- All users must keep their passwords private
- All users must log off or lock their machines if they leave a computer unattended.
- All users must log off when they are finished with a computer
- All users should be aware that all actions on computers are monitored and can be recorded
- Users should not attempt to bypass the filters, or gain inappropriate access to content or servers.

### **Legislation**

The school will provide information on the following legislation relating to the use of the Internet with teachers and students and parents should familiarise themselves with:

- Data Protection (Amendment) Act 2003;
- Child Trafficking and Pornography Act 1998;
- Interception Act 1993;
- Video Recordings Act 1989;
- The Data Protection Act 1988.

### **The following are not permitted:**

- Posting, displaying or approving of offensive messages or pictures on social networking sites
- Using obscene language in emails or on social networking sites
- Harassing, insulting or attacking others via email / social networking sites

- Violating copyright laws (illegal downloading of Software / Music /Movies) • Using another's user ID/password
- Supplying others with your user ID/password or not taking appropriate measures to protect your details
- Illegal use of data in folders or work files
- Intentionally wasting limited resources
- Employing the network for commercial purposes Within reason, freedom of speech and access to information will be honoured.

During school, teachers will guide students toward appropriate materials. Outside of school, parents / guardians bear the same responsibility for such guidance as they exercise with information sources such as television, telephones, mobile phones, movies, radio, electronic devices and other potentially offensive media.

### **School Issued Devices (including Mobile Devices, Laptops, iPads and Chromebooks)**

The school may issue devices to students for use during their schooling. These devices remain Mulroy College's property at all times and must be returned to the school on request. Students must have read and accepted the ICT and Internet Usage Policy before a device is issued to them. The school provides instruction on how to back-up the data on the devices but takes no responsibility for data loss. Students should ensure that they have an adequate backup of their data (e.g. Google Drive). Devices may be monitored remotely and students may be required to remove some applications that are not educational in nature. All devices will work through the school web filtering system. The taking of images/video while in school using the student's own devices or school-issued devices is strictly forbidden within this policy except where deemed appropriate by a teacher/staff member.

- Students will take all reasonable precautions to ensure the physical safety and security of school-issued devices.
- School-issued devices may only be used in the school or at home. They will not be used while travelling to or from school or in the GP areas.
- Students will ensure that school-issued devices are charged and ready for use at the start of each school day.
- Students will use devices primarily for educational purposes.

### **Consequences for Unacceptable Usage**

Users who engage in any of the above-referenced activities (or who are deemed not to be using the facilities in a responsible way), may have their access privileges revoked and other disciplinary measures may result. The Code of Behaviour applies to students' usage of ICT and the Internet.

### **Policy Review**

This ICT Acceptable Usage Policy may be amended from time to time as is deemed necessary by the school. A copy will be made available to all new students and their parents / guardians. It is the responsibility of the students and their parents / guardians to ensure familiarity with the current version.

### **Recommendations for the Use of ICT and the Internet**

- Do not engage (while in school or elsewhere) in any of the unacceptable online activities described above and remember that the school's Code of Behaviour applies to your usage of ICT and the Internet.
- Never give out personal information (for example: your full name, home address, date of birth, telephone number, your parents' / guardians' work address or telephone number, credit card numbers, bank details) without your parents' / guardians' permission.
- Never give out the name and location of your school without the permission of a member of staff for the purpose of learning and teaching.
- Always tell your parents / guardians immediately if you see or receive anything on the Internet that makes you feel uncomfortable or threatened; this includes e-mail messages, websites, or even anything in the regular mail from Internet friends. Above all, do not reply or respond and do remember to save copies of such material.
- Never agree to meet anyone in person that you have met online, without your parents' / guardians' permission.
- Never send pictures of yourself or other family members to other people through the Internet or regular mail without your parents' / guardians' permission.
- Never share your Internet passwords with anyone (even your best friends) other than your parents / guardians / I.T. teachers.
- Behave appropriately while online and do not do anything that could hurt or anger other people or that is against the law.
- Never download, install, or copy anything from disks, data storage devices or the Internet without proper permission.
- Never do anything on the Internet or mobile device that costs money without your parents' / guardians' permission.
- Never use a bank or credit card without the express permission of the owner of that card. I have read and understand this policy and agree to adhere to all rules and regulations as set out in this policy.
